INDEX TO VOLUME XVII

Acceleration, The, of the alcoholic fermentation of cane molasses by the use of vegetable carbons and other inert substances. Abstract 28
Acid-fast bacteria, The influence of iron on the pigmentation of 407
Acree, S. F., and Fawcett, Edna H. The problem of dilution in colorimetric H-ion measurements. I. Isohydric indicator methods for accurate determination of pH in very dilute solutions 163
Allen, O. N., and Baldwin, I. L. The effect of plant passage on certain strains of the root nodule bacteria. Abstract 20
Allgeier, R. J., Peterson, W. H., and Fred, E. B. A colorimetric method for the determination of butyric acid 79
Amino acids, Proteolysis and the selective destruction of, by *Clostridium sporogenes* and *Clostridium histolyticum* 151
Anaerobic bacteria, A review of the development and application of physical and chemical principles in the cultivation of obligately 255
Analysis, An, of six thousand consecutive routine blood cultures. Abstract . 48
Antiseptic, The, action of U. S. P. and N. F. ointments. Abstract 44
Application, The, of Weiss' flagella method for the staining of spirochetes. Abstract 61
Arrowood, Julia G., and Belding, David L. Chromogenesis in *B. salmonicida*. Abstract 55
Auxiliary, An, antigen for the Kahn test. Abstract 49

Bacilli, A study of two hundred cultures of gram-negative, isolated from cases of genito-urinary infection 205
Bact. aerogenes, Relationships of the encapsulated bacilli with special reference to 339
Bacteria in soil, Use of the microscope in studying the activities of 399
Bacteria, Life cycles in 63
——, Relationship of heat production to phases of growth of. Bacterial calorimetry II 123
——, A review of the development and application of physical and chemical principles in the cultivation of obligately anaerobic 255
——, spore forming, of soils, Bacterial antagonism with special reference to the effect of *Pseudomonas fluorescens* on 89
Bacteria, Root-nodule, of the leguminosae, Nomenclature of the 141
Bacterial antagonism with special reference to the effect of *Pseudomonas fluorescens* on spore forming bacteria of soils 89
—— calorimetry. Abstract 3
—— ——. I. General considerations. Description of differential micro-calorimeter 105

Bacterial calorimetry. II. Relationship of heat production to phases of growth of bacteria 123
—— cell, An improved method of culture from a single 377
——, The, count of ice cream held at freezing temperatures. Abstract 38
——, The, flora of pasteurized milk. Abstract 35
—— growth, The effect of filtrates of certain intestinal microbes upon. Its relation to organic acid production 315
—— numbers, Effect of temperature on, in digesting sewage sludge 247
Bactericidal effects of sunlight as affected by glass. Abstract 46
Bacteriological characteristics of *Streptococcus epidemicus* isolated during a septic sore throat epidemic. Abstract 53
Bacteriophage as a substitute for the typhoid vaccine. Abstract 42
Baldwin, I. L., and Allen, O. N. The effect of plant passage on certain strains of the root nodule bacteria. Abstract 20
—— and Fred, E. B. Nomenclature of the root-nodule bacteria of the leguminosae 141
Barnes, La Verne. A note on the use of "specific wet dressings" of staphylococci according to the method of Besredka. Abstract 41
—— Effect of oral administration of ox-bile on appearance of agglutinins for *Esch. coli* in sera of normal rabbits. Abstract 40
—— Effect of oral and subcutaneous injections of *Pasteurella avicida* in rabbits vaccinated by the oral and intravenous methods. Abstract 40
Batchelor, Harold W., and Curie, Irvin H. A practical method for determining the number of *Clostridium butyricum* colonies in acid soil. Abstract 25
Bayne-Jones, Stanhope. Bacterial calorimetry. I. General considerations. Description of differential microcalorimeter 105
—— and Rhees, Henrietta S. Bacterial calorimetry. Abstract 3
—— and —— Bacterial calorimetry II. Relationship of heat production to phases of growth of bacteria 123
Belding, David L., and Arrowood, Julia G. Chromogenesis in *B. salmonicida*. Abstract 55
Bengston, Ida A. The origin and nature of the epithelial cell inclusions in trachoma and their relationship to the disease. Abstract 54
Biochemical aspects of the acetone butyl alcohol fermentation of corn meal. Abstract 27
Boak, Ruth, Chapman, O. D., and Carpenter, C. M. The significance of *Brucella abortus* agglutinins in human sera. Abstract 59
Branch, Arnold, Steenken, William, Jr., and Petroff, S. A. A study of bacillus Calmette-Guerin (B. C. G.) 1. Biological characteristics, cultural "dissociation" and animal experimentation. Abstract 57
Branham, Sara E. An improved technique for the comparison of antiseptics by the yeast fermentation method. Abstract 44
Breed, Robert S., Prickett, Paul S., and Yale, M. W. The significance of thermophilic spore-forming bacteria in pasteurized milk. Abstract 37
Brewer, C. M., and Reddish, George F. A comparison of the hygienic laboratory test with the method used by the department of agriculture for testing disinfectants. Abstract 44

Broadhurst, Jean. Hastening gas appearance in presumptive coli tests. Abstract 12
Butyric acid, A colorimetric method for the determination of 79

C. bifermentans, Strain variations in 387
Calorimetry, Bacterial. I. General considerations. Description of differential microcalorimeter 105
——, ——. II. Relationship of heat production to phases of growth of bacteria 123
Cameron, E. J. The scope and findings of field work during the canning season of 1928. Abstract 31
Carpenter, C. M. The effect of heat produced by an alternating electric current on tubercle bacilli in milk. Abstract 38
——, Boak, Ruth, and Chapman, O. D. The significance of *Brucella abortus* agglutinins in human sera. Abstract 59
Carroll, W. R. The use of asparagus extract in media for the cultivation of legume nodule bacteria. Abstract 21
Certain biochemical reactions produced by the streptococci. Abstract 6
Changes of the endpoint of fermentation by very large seeding. Abstract 28
Chapman, O. D., Carpenter, C. M., and Boak, Ruth. The significance of *Brucella abortus* agglutinins in human sera. Abstract 59
Chromogenesis in *B. salmonicida*. Abstract 55
Clark, Paul F., Middleton, William S., and Wilson, Otis M. Permeability of the respiratory tract to old tuberculin. Abstract 57
Clark, F. M., and Sears, O. H. Non-reciprocal interchangeability of the wood's clover and garden bean nodule bacteria. Abstract 20
Classification of the streptococci of human feces 413
Clostridium histolyticum, Proteolysis and the selective destruction of amino acids by *Clostridium sporogenes* and 151
—— *sporogenes* and *Clostridium histolyticum*, Proteolysis and the selective destruction of amino acids by 151
Clowes, G. H. A., Jamieson, W. A., and Powell, H. M. Further studies on the immunology of the pneumococcus. Abstract 49
Colorimetric, A, method for the determination of butyric acid 79
—— H-ion measurements, The problem of dilution in. I. Isohydric indicator methods for accurate determination of pH in very dilute solutions 163
Comparison, A, of the hygienic laboratory test with the method used by the department of agriculture for testing disinfectants. Abstract 44
Conn, H. J. Progress in standardization of biological stains. Abstract 17
—— Use of the microscope in studying the activities of bacteria in soil. Abstract 23
—— Use of the microscope in studying the activities of bacteria in soil 399
Contaminated water as a source of surface flavor in pasteurized creamery butter. Abstract 39
Contribution, A, to the classification of microorganisms treating the orders Eubacteriales and Actinomycetales. Abstract 8
Convenient, A, case for sterilizing and storing micropipettes. Abstract 10
Corynebacterium ulcerans: Its possible epidemiological importance. Abstract. 52

Cruess, W. V., and Richert, P. H. Effect of hydrogen ion concentration on the toxicity of sodium benzoate to microorganisms 363
Culture media made from commercial dried yeast, The use of, as a routine substitute for meat infusion peptone media 329
—— mediums, The value of vegetable extracts in 379
Cultural, The, differentiation of *B. radiobacter* (Beij.) and closely related organisms. Abstract 22
Curie, Irvin H., and Batchelor, Harold W. A practical method for determining the number of *Clostridium butyricum* colonies in acid soil. Abstract 25

Demeter, Karl J. Studies on lactic acid streptococci. II. On streptococcus lactis L. and its relation to the fecal streptococci. Abstract 32
Denson, W. P., and Owen, William L. The acceleration of the alcoholic fermentation of cane molasses by the use of vegetable carbons and other inert substances. Abstract 28
Destruction, The, of luminous bacteria by high frequency sound waves 373
Dewey, E. T., Shillinger, J. E., Green, R. G., and Ziegler, N. R. Experimental transmission of epizootic encephalitis of foxes. Abstract 54
Dilution, The problem of, in colorimetric H-ion measurements. I. Isohydric indicator methods for accurate determination of pH in very dilute solutions 163
Discoloration of halibut. Abstract 29
Disinfection, Studies on the mechanism of. I. The germicidal action of halogen derivatives of phenol and resorcinol and its impairment by organic matter 423
Dissociation of acido-proteolytic bacteria by the climbing culture method. Abstract 1
Drake, E. T., and Sturges, W. S. Strain variations in *C. bifermentans*. Abstract 15
—— and—— Strain variations in *C. bifermentans* 387
——, Sturges, W. S., and Parsons, L. B. Quantitative aspects of the metabolism of anaerobes. IV. The nature of the volatile acid produced by *C. histolyticum*. Abstract 14
Dunham, D. H. Outbreak of mold in a cheese factory. Abstract 39

Edwards, Philip R. Relationships of the encapsulated bacilli with special reference to *Bact. aerogenes* 339
Effect, The, of filtrates of certain intestinal microbes upon bacterial growth. Its relation to organic acid production 315
——, The, of heat produced by an alternating electric current on tubercle bacilli in milk. Abstract 38
—— of hydrogen ion concentration on the toxicity of sodium benzoate to microorganisms 363
Effect of oral administration of ox-bile on appearance of agglutinins for *Esch. coli* in sera of normal rabbits. Abstract 40
—— of oral and subcutaneous injections of *Pasteurella avicida* in rabbits vaccinated by the oral and intravenous methods. Abstract 40

Effect, The, of plant passage on certain strains of the root nodule bacteria. Abstract 20
——, The, of specific sera upon the phenomenon of local skin reactivity to *B. typhosus* culture filtrate. Abstract 43
—— of temperature on bacterial numbers in digesting sewage sludge 247
Eijkman, The, fermentation test as an aid in the detection of fecal organisms in water. Abstract 11
Ellis, M. G., Hill, J. H., Seidman, L. R., and Stadnichenko, A. M. S. A study of two hundred cultures of gram-negative bacilli isolated from cases of genito-urinary infection 205
Encapsulated bacilli, Relationships of the, with special reference to *Bact. aerogenes* 339
Epizootic lymphadenitis in the guinea-pig. Abstract 54
Evans, Alice C. Life cycles in bacteria 63
Experimental transmission of epizootic encephalitis of foxes. Abstract 54
—— tularemia infection in birds. Abstract 55

Famulener, L. W., and Heeks, W. G. An analysis of six thousand consecutive routine blood cultures. Abstract 48
Favorable, The, rôle of cysteine in the cultivation of anaerobic organisms. Abstract 12
Fawcett, Edna H., and Acree, S. F. The problem of dilution in colorimetric H-ion measurements. I. Isohydric indicator methods for accurate determination of pH in very dilute solutions 163
Feces, Classification of the streptococci of human 413
Filtration experiments with the granular form of the tubercle bacillus. Abstract 56
Fleming, William L., Neill, James M., Sugg, John Y., and Richardson, Lurline V. The use of culture media made from commercial dried yeast as a routine substitute for meat infusion peptone media 329
Fred, E. B., Allgeier, R. J., and Peterson, W. H. A colorimetric method for the determination of butyric acid 79
Fred, E. B., and Baldwin, I. L. Nomenclature of the root-nodule bacteria of the leguminosae 141
——, Hopkins, E. W., and Peterson, W. H. The gum produced by the root nodule bacteria of the leguminosae. Abstract 22
——, Stiles, H. R., and Peterson, W. H. Biochemical aspects of the acetone butyl alcohol fermentation of corn meal. Abstract 27
Freeman, Dorothy V., and vanSaun, Anna I. Primary diphtheric vaginitis in children. Abstract 51
Further studies on certain aciduric organisms of dental and salivary origin. Abstract 7
—— —— on the immunology of the pneumococcus. Abstract 49

Genito-urinary infection, A study of two hundred cultures of gram-negative bacilli isolated from cases of 205
—— ——, Thirty strains of Gram-positive cocci isolated from cases of 303
Gerdeman, Alice E., and Weinzirl, John. The bacterial count of ice cream held at freezing temperatures. Abstract 38

Gibbard, James. A simplified culture medium for the isolation of *Neisseria gonorrhoeae*. Abstract 47
Gilbert, Ruth. *Corynebacterium ulcerans:* its possible epidemiological importance. Abstract 52
Gorini, Constantino. Dissociation of acido-proteolytic bacteria by the climbing culture method. Abstract 1
Gram-positive cocci, Thirty strains of, isolated from cases of genito-urinary infections 303
Green, R. G., and Wade, E. M. Experimental tularemia infection in birds. Abstract 55
Green, R. B., Ziegler, N. R., Dewey, E. T., and Shillinger, J. E. Experimental transmission of epizootic encephalitis of foxes. Abstract 54
Greenbank, George R., and Rogers, L. A. The rate of growth of a colony of bacteria. Abstract 2
Grossman, A. B., Perkins, Roger G., Heeren, Ralph, and Megrail, Emerson. Seasonal variation in antitoxin content of human blood. Abstract 49
Growing, The, of pure cultures from single cells of non-spore forming bacteria. Abstract 10
Growth of *Cl. botulinum* in "waterless-processed" string beans. Abstract 32
Gum, The, produced by the root nodule bacteria of the leguminosae. Abstract 22

Hall, Ivan C. A review of the development and application of physical and chemical principles in the cultivation of obligately anaerobic bacteria 255
——, Jungherr, Erwin, and Rymer, Marion Reinhardt. The identity of *Bacillus Sordellii* and *Clostridium oedematoides*. Abstract 15
Halogen derivatives of phenol and resorcinol, the germicidal action of, and its impairment by organic matter. Studies on the mechanism of disinfection, I 423
Harding, H. A., Ward, A. R., and Harding, H. G. The bacterial flora of pasteurized milk. Abstract 35
Harding, H. G., Harding, H. A., and Ward, A. R. The bacterial flora of pasteurized milk. Abstract 35
Harrison, F. C., and Sadler, W. Discoloration of halibut. Abstract 29
Harvey, E. Newton, and Loomis, Alfred L. The destruction of luminous bacteria by high frequency sound waves 373
Hastening gas appearance in presumptive coli tests. Abstract 12
Hausmann, Theodore W. Bactericidal effects of sunlight as affected by glass. Abstract 46
Heeks, W. G., and Famulener, L. W. An analysis of six thousand consecutive routine blood cultures. Abstract 48
Heeren, Ralph, Megrail, Emerson, Grossman, A. B., and Perkins, Roger G. Seasonal variation in antitoxin content of human blood. Abstract 49
Heukelekian, H., and Rudolfs, Willem. Effect of temperature on bacterial numbers in digesting sewage sludge 247
Hill, J. H., Seidman, L. R., Stadnichenko, A. M. S., and Ellis, M. G. A study of two hundred cultures of Gram-negative bacilli isolated from cases of genito-urinary infection 205

Hill, Justina H., and White, Edwin C. The use of sodium chloride in culture media for the separation of certain Gram-positive cocci from Gram-negative bacilli. Abstract 47
Hitchner, E. R. Isolation of a bacteriolytic principle from the root nodules of red clover. Abstract 19
Hoffstadt, Rachel E., and Martin, Carl E. Immunological studies of typhoid vaccination by mouth. 3. Agglutinins and complement fixation reactions formed in persons treated with typhoid bacterin in capsule. Abstract 42
—— and Thompson, Randall L. Immunological studies of typhoid vaccination by mouth. 1. Agglutinins formed in persons treated orally with triple typhoid bacterin. Abstract 41
—— and ——. Immunological studies of typhoid vaccination by mouth. 2. Complement fixations and precipitin reactions in persons treated orally with bile and triple typhoid bacterin. Abstract 41
Hopkins, E. W., Peterson, W. H., and Fred, E. B. The gum produced by the root nodule bacteria of the leguminosae. Abstract 22
Hoyt, Robert N., and Megrail, Emerson. Epizootic lymphadenitis in the guinea-pig. Abstract 54
Hucker, G. J. Certain biochemical reactions produced by the streptococci. Abstract 6
—— Relationships of the various acid-proteolytic cocci. Abstract 33
Huddleson, I. Forest. The pathogenicity of the species of the genus brucella for monkeys. Abstract 58
Humfeld, Harry, and Smith, Nathan R. Preliminary bacteriological studies on two acid soils. Abstract 24
Hydrogen ion concentration, Effect of, on the toxicity of sodium benzoate to microörganisms 363

Identity, The, of *Bacillus Sordelii* and *Clostridium oedematoides*. Abstract ... 15
Immunological studies of typhoid vaccination by mouth. 1. Agglutinins formed in persons treated orally with triple typhoid bacterin. Abstract .. 41
—— —— —— —— —— —— ——. 2. Complement fixations and precipitin reactions in persons treated orally with bile and triple typhoid bacterin. Abstract 41
—— —— —— —— —— —— ——. 3. Agglutinins and complement fixation reactions formed in persons treated with typhoid bacterin in capsule. Abstract 42
Improved, An, method of culture from a single bacterial cell 377
——, An, technique for the comparison of antiseptics by the yeast fermentation method. Abstract 44
Influence, The, of carbon dioxide on diphtheria toxin production and preservation. Abstract 52
Influence, The, of iron on the pigmentation of acid-fast bacteria 407
Intestinal microbes, The effect of filtrates of certain, upon bacterial growth. Its relation to organic acid production 315
Iron, The influence of, on the pigmentation of acid-fast bacteria 407

Seasonal variation in antitoxin content of human blood. Abstract..... 49
Sewage sludge, Effect of temperature on bacterial numbers in digesting..... 247
Shillinger, J. E., Green, R. G., Ziegler, N. R., and Dewey, E. T. Experimental transmission of epizootic encephalitis of foxes. Abstract..... 54
Shternov, Vladimir A., Klarmann, Emil, and VonWowern, John. Studies on the mechanism of disinfection. 1. The germicidal action of halogen derivatives of phenol and resorcinol and its impairment by organic matter..... 423
Shutt, Donald Bethune. Contaminated water as a source of surface flavor in pasteurized creamery butter. Abstract..... 39
Shwartzman, Gregory. The effect of specific sera upon the phenomenon of local skin reactivity to *B. typhosus* culture filtrate. Abstract..... 43
Significance, The, of *Brucella abortus* agglutinins in human sera. Abstract... 59
——, The, of thermophilic spore-forming bacteria in pasteurized milk. Abstract..... 37

Simplified, A, culture medium for the isolation of *Neisseria gonorrhoeae*. Abstract 47
Smith, Nathan R., and Humfeld, Harry. Preliminary bacteriological studies on two acid soils. Abstract 24
Society of American Bacteriologists, Thirtieth Annual Meeting, Richmond, Virginia, December 27, 28, 29, 1928 1
Sodium benzoate, Effect of hydrogen ion concentration on the toxicity of, to microörganisms 363
Soil, Use of the microscope in studying the activities of bacteria in 399
Soils, Bacterial antagonism with special reference to the effect of *Pseudomonas fluorescens* on spore forming bacteria of 89
Some factors influencing the heat resistance of bacterial spores. Abstract 16
—— influences of the development of higher plants upon the abundance and activities of microörganisms in the soil. Abstract 26
Sound waves, The destruction of luminous bacteria by high frequency 373
Soule, M. H. The respiration of the abortus-melitensis group. Abstract 59
Spore forming bacteria of soils, Bacterial antagonism with special reference to the effect of *Pseudomonas fluorescens* on 89
Stadnichenko, Asya M. S. Thirty strains of Gram-positive cocci isolated from cases of genito-urinary infections 303
——, Hill, J. H., Seidman, L. R., and Ellis, M. G. A study of two hundred cultures of Gram-negative bacilli isolated from cases of genito-urinary infection 205
Stark, C. N., and Stark, Pauline. Physiological difference between young and old bacterial cells. Abstract 2
Stark, Pauline, and Stark, C. N. Physiological difference between young and old bacterial cells. Abstract 2
Starkey, R. L. Some influences of the development of higher plants upon the abundance and activities of microorganisms in the soil. Abstract 26
Steenken, William, Jr., Petroff, S. A., and Branch, Arnold. A study of bacillus Calmette-Guerin (B. C. G.). 1. Biological characteristics, cultural "dissociation" and animal experimentation 57
Stiles, H. R., Peterson, W. H., and Fred, E. B. Biochemical aspects of the acetone butyl alcohol fermentation of corn meal. Abstract 27
Strain variations in *C. bifermentans*. Abstract 15
—— variations in *C. bifermentans* 387
—— variation in the root nodule bacteria of clover, Rhizobium trifolii. Abstract 17
Streptococci, Classification of the, of human feces 413
Studies on the Kahn reaction with spinal fluids. Abstract 50
—— on lactic acid streptococci. II. On streptococcus lactis L. and its relation to the fecal streptococci. Abstract 32
—— on the mechanism of disinfection. 1. The germicidal action of halogen derivatives of phenol and resorcinol and its impairment by organic matter 423
Study, A, of bacillus Calmette-Guerin (B. C. G.). 1. Biological characteristics, cultural "dissociation" and animal experimentation. Abstract 57

Study, A, of two hundred cultures of Gram-negative bacilli isolated from cases of genito-urinary infection 205
Sturges, W. S., and Drake, E. T. Strain variations in *C. bifermentans*. Abstract 15
—— and ——. Strain variations in *C. bifermentans* 387
——, Parsons, L. B., and Drake, E. T. Quantitative aspects of the metabolism of anaerobes. IV. The nature of the volatile acid produced by *C. histolyticum*. Abstract 14
Sugg, John Y., Richardson, Lurline V., Fleming, William L., and Neill, James M. The use of cultural media made from commercial dried yeast as a routine substitute for meat infusion peptone media 329

Temperature, Effect of, on bacterial numbers in digesting sewage sludge 247
Tetrault, P. A., and McCoy, Elizabeth. A modification of McLeod's anaerobic plate. Abstract 14
Thermophilic spore-formers associated with milk. Abstract 36
Thirty strains of Gram-positive cocci isolated from cases of genito-urinary infections 303
Thompson, Luther. The value of vegetable extracts in culture media. Abstract 4
——. The value of vegetable extracts in culture mediums 379
Thompson, Randall L., and Hoffstadt, Rachel E. Immunological studies of typhoid vaccination by mouth. 1. Agglutinins formed in persons treated orally with triple typhoid bacteria. Abstract 41
—— and ——. Immunological studies of typhoid vaccination by mouth. 2. Complement fixations and precipitin reactions in persons treated orally with bile and triple typhoid bacteria. Abstract 41
Thornton, H. R. Reduction of janus green B in milk. Abstract 34

Upton, Margaret F. The effect of filtrates of certain intestinal microbes upon bacterial growth. Its relation to organic acid production 315
Use, The, of asparagus extract in media for the cultivation of legume nodule bacteria. Abstract 21
——, The, of culture media made from commercial dried yeast as a routine substitute for meat infusion peptone media 329
—— of the microscope in studying the activities of bacteria in soil. Abstract .. 23
—— of the microscope in studying the activities of bacteria in soil 399
——, The, of sodium chloride in culture media for the separation of certain Gram-positive cocci from Gram-negative bacilli. Abstract 47

Valley, George. The favorable rôle of cysteine in the cultivation of anaerobic organisms. Abstract 12
Value, The, of vegetable extracts in culture media. Abstract 4
——, The, of vegetable extracts in culture mediums 379
Van Saun, Anna I., and Freeman, Dorothy V. Primary diphtheric vaginitis in children. Abstract 51
Variation, The, of the phenol coefficients of coal tar disinfectants with the use of different test organisms. Abstract 45

Vegetable extracts, The value of, in culture mediums..... 379
von Rashevsky, N. and E., and Mellon, Ralph R. The radiation of ultra-violet light—mitogenetic rays, so-called—by bacteria and higher plants. Abstract..... 5
von Wowern, John, Klarmann, Emil, and Shternov, Vladimir A. Studies on... 423

Wade, E. M., and Green, R. G. Experimental tularemia infection in birds. Abstract..... 55
Wales, H., and Reddish, George F. The antiseptic action of U. S. P. and N. F. ointments. Abstract..... 44
Ward, A. R., Harding, H. A., and Harding, H. G. The bacterial flora of pasteurized milk. Abstract..... 35
Weinzirl, John. Nuts as a possible source of *Escherichia coli* found in candy. Abstract..... 29
—— and Gerdeman, Alice E. The bacterial count of ice cream held at freezing temperatures. Abstract..... 38
Weiss, Emil. An organism isolated from three cases of bacteremia after appendicitis. Abstract..... 60
——. The application of Weiss' flagella method for the staining of spirochetes. Abstract..... 61
Welch, Henry. Classification of the streptococci of human feces..... 413
White, Edwin C., and Hill, Justina H. The use of sodium chloride in culture media for the separation of certain Gram-positive cocci from Gram-negative bacilli. Abstract..... 47
Williams, O. B. Some factors influencing the heat resistance of bacterial spores. Abstract..... 16
Wilson, Otis M., Clark, Paul F., and Middleton, William S. Permeability of the respiratory tract to old tuberculin. Abstract..... 57
Wright, William H. A convenient case for sterilizing and storing micro-pipettes. Abstract..... 10
—— and Nakajima, Hisashi. The growing of pure cultures from single cells of non-spore forming bacteria. Abstract..... 10
——, Ricker, A. J., and Sagen, H. E. The cultural differentiation of *B. radiobacter* (Beij.) and closely related organisms. Abstract..... 22

Yale, M. W., Breed, Robert S., and Prickett, Paul S. The significance of thermophilic spore-forming bacteria in pasteurized milk. Abstract..... 37
Yeast, The use of culture media made from commercial dried, as a routine substitute for meat infusion peptone media..... 329

Ziegler, N. R., Dewey, E. C., Shillinger, J. E., and Green, R. G. Experimental transmission of epizootic encephalitis of foxes. Abstract..... 54
Zucker, Franz. Relation between electrophoresis and certain characteristics of the root nodule bacteria. Abstract..... 18
